**The International
Design in
Government
community is
a valuable
resource for
designers across
governments.
We aim to share
common service
patterns and
best practice.**

**We bring together
government
designers from
around the world
who work across
design, user
research,
accessibility and
content design.**

**There are
big design
challenges facing
governments
today.**

**Ones that could
and should be
tackled at a
global scale.**

**We're meeting
the Government
Transformation
Strategy priority
to share what
the UK has built
internationally
and learn from
best practice in
other countries
to continuously
improve our
services.**
